

“It has saved us money and time over the years...”

Dental staff talk about Data Vision and Oasis...

Judy Mills
Financial Administrator
Adelaide Endodontic Specialists

Adelaide Endodontic Specialists

Since December 1994, Adelaide Endodontic Specialists (AES) has operated under the Oasis practice management system.

Judy Mills, the clinic's Financial Administrator, remembers that it was her first project with AES back in 1994 to investigate five practice management systems, compare them and select the new one.

At the time, she just couldn't fault Oasis – and it turns out she made the right decision.

“What makes it work even better for us, is the service and support we receive from Davide and Data Vision,” Judy explained.

Davide Rinaldi is Data Vision's Director.

“The service we receive is always excellent. I wouldn't hesitate to recommend Oasis and Data Vision.”

“It has saved us money and time over the years and has meant less stress for all of us!”

AES has 11 computers networked with Oasis.

Judy said the system is seamless for staff and clients.

“Our digital imaging technology is integrated for the whole practice.”

“Our records are instantly accessible and our payment procedures are stress-free.”

Judy said the reliability of Oasis and Data Vision is vital to the success of the business.
