

“Oasis is easy to use. Not at all complicated.”

Dental staff talk about Data Vision and Oasis...

Michelle Whiteside
Practice Manager
Rose Park Dental, South Australia

Peter Noblet, David Mann
and Rory Hancock
Rose Park Dental

Since 1996, Rose Park Dental has operated under the Oasis practice management system. They chose the system after comparing it to a number of others.

The clinic is always well supported for IT back up and service by Adelaide dental IT specialists, Data Vision, under the guidance of Director, Davide Rinaldi.

Michelle Whiteside, Practice Manager, said the service they receive from Data Vision is 'totally professional'.

"We have 14 computers networked so we are very reliant on Oasis and Data Vision," Michelle explained.

"It's the seamless nature of the system and its flow and ease of use that really stands out for me as the key feature. It's brilliant. Our patient records are so easy to access and utilise."

"Accounts are able to be settled immediately thanks to the link with HICAPS at the time of appointment. Patients don't have to fill out forms so they are very happy with the system too."

"Oasis is easy to use, not at all complicated."

Michelle says the service they receive from Data Vision is at the heart of their satisfaction.

"We are confident in the knowledge that whenever we need IT support, for any aspect of our practice's hardware or software, we don't have to wait."

"Davide and his team always provide assistance straight away. It makes all the difference."
