

“Our patients are getting better service from us.”

Dentists talk about Data Vision and Oasis...

Tom Andritsakis
Dental Surgeon
Sefton Park, South Australia

Tom Andritsakis has run a successful dental practice at Sefton Park, just north of Adelaide, for about 20 years.

Up until early 2005, Tom and his staff had been using an alternative practice management system for five years. For a range of reasons, Tom had become very dissatisfied with it and investigated four other management systems to find the right one for his practice.

In the end, the decision was easy. They chose Oasis for its ease of use and for the expert local support that accompanied it, in the form of Data Vision. Davide Rinaldi, Data Vision Director, and his staff are dental IT specialists who are based in Adelaide and provide professional, reliable support. That was the clincher for Tom and his staff.

“The Oasis/Data Vision combination saves us time, saves us money, reduces stress and reduces hassle,” Tom said.

“Data Vision’s service is second to none, prompt and quick. And Oasis is perfect for us. My staff members say Oasis is so much easier and quicker to use.”

“They are much happier with the way the practice runs now, much smoother than under the previous system.”

“It is far more efficient and we are light years ahead of where we were at the beginning of 2005.”

“Knowing we are backed by Data Vision’s reliable service and expert knowledge gives us reassurance and confidence about Oasis and all of our IT hardware and software.”

“The clinic’s cash flow is vastly improved thanks to the seamless ability Oasis has to link HICAPS with instantaneous invoicing at the time of appointment, and to effectively track outstanding accounts.”

“Oasis has enabled better patient management thanks to effective treatment plans and easily accessible clinical notes.”

“Financial management and patient tracking are all linked together.”

“We are using less and less paper and nothing gets lost. Our patients are getting better service from us.”
